Caroma Introduces a High Efficiency Dual Flush Toilet for Under Counter Installations

Expanding toilet opportunities for limited spaces

HILLSBORO, OREGON – July 1, 2008 – Caroma, the leader in dual flush toilets and stylish bathroom sinks, announces the newest high efficiency dual flush toilet (HET): **Sydney Low Profile**. The Low Profile is ideal for installations that want to conserve water and require a shorter toilet due to space restrictions, such as under a counter or a grab bar in ADA installations.

Two configurations of the new Sydney Low Profile are WaterSense-approved, certifying exceptional performance and reduced water use. The toilet is only 26 ½” tall. This unique feature allows it into many commercial installations where standard height dual flush toilets don’t fit, such as condominiums, townhouses, apartments or hotels where countertops extend over the toilet.

The two button dual flush toilets give the user a choice: half flush for liquid or full flush for solids. Compared with an older 3.5 gallon toilet, a family of four could save nearly 18,000 gallons of water per year by switching to a Caroma dual flush toilet. A city of 10,000 people could save more than five million gallons of water per year with dual flush toilets.

“Water is critical to everyday life, and conserving the world’s most valuable resource has become a necessity,” states Derek Kirkpatrick, Caroma North America Manager. “In the home, it is estimated that toilets are responsible for a third of residential water usage. By installing a water conserving toilet, such as the new Sydney Low Profile, we can help the environment through water conservation, save space in the bathroom, and save money on monthly expenses.”

The Sydney Low Profile is available in six bowl configurations including two Round Front Plus options, two elongated options, an Easy Height Round Front Plus, and an Easy Height Elongated. All Caroma dual flush toilets feature wash down flushing, a large trapway (nearly double the industry average) to virtually eliminate clogging, and a 12” rough-in or 10-12” adjustable rough-in.

The new Low Profile is now available in white and biscuit (special order).

About Caroma

Since 1941, Caroma has been a world leader in quality and innovation of bathroom products, continually providing reliable, high efficiency toilet suites and sinks. With 36 WaterSense-approved toilets – more than any company in the industry - and complimentary, stylish sinks, Caroma offers award-winning products that help preserve the world's most valuable resource - water.
